QMA Adaptor

for RJ11/45 tel/data connector

Mounts RJ11/RJ14/RJ45 telco/data jacks to allow flexible signal assignment of mixed signal connectors on Moduline® standard inserts. Installs in XLR female connector hole pattern, reversible design works on Switchcraft D*F or “universal” style hole pattern. Constructed of 16 gauge steel the adapter can be rear mounted with blind rivets or screws and the appropriate connector snapped in place. The QMA accommodates Leviton Quickport snap-in module series, tel/data connectors or equivalent. These connectors are readily available from telco supply distributors worldwide.

Hole Filler Plugs

HFP.375 Snap in plastic hole plug for .375” dia. center hole of MultiPunch® connector spaces or any .375” diameter hole. Textured non glare finish hole plug tapers at edge to surface of surrounding metal panel.
