

RP series • *Rocket Pocket*

The RP series installs in a raised wooden floor to provide a single microphone input and convenient cable storage in the space below. A sliding panel protects the self-ejecting connector from damage and debris. The cable

returns by gravity feed, and requires no moving parts. Heavy-gauge steel cover is finished in antique brass or satin black. A solderless female microphone connector and terminal block with built-in strain relief are included.

RP11

RP10 satin black
RP11 antique brass

Nominal size: 4½"x2¾"x4"

Additional depth required — see website for TechNote TN16.
