

FlexiConn series connectors

Based on the Neutrik D series cutout, our in-stock FlexiConn series connectors add increased flexibility to all FMCA and TC series floor boxes and FP series wall panels, without the extra cost and lead time of a custom panel. Many additional connectors can be special ordered, often with no added incoming freight charge.

Additional panels are available to accommodate **active devices**, and barrier separated **AC power**.

The FlexiConn series offers the simplest and most elegant solution for most low voltage applications. For applications that need additional consideration, please consult our website, or contact us directly, and let us configure a solution that meets your needs.

Mystery Electronics attractive and durable floor boxes are ideal for classrooms, houses of worship, conference rooms, courtrooms, performance venues or anywhere connections are needed in the floor.

Use FlexiConn series connectors with the sample panels below:

FMCA and AW series

MPK
4ea Neutrik® D or
4eaSwitchCraft® D3F

MPM
2ea Neutrik® D or
2eaSwitchCraft® D3F,
1ea VGA and 2ea pilot holes

MPU
Punched for Extron MAAP®
and 2ea Neutrik® D

FP601 Flat Wall Panel

TC series

DPA
1ea XLR

DPB
2ea XLR

DPA
1ea XLR
